

## Solar System 4D energy vortex

*„Only transcendental philosophy knows the path. Only the illumined reason can carry the understanding part of man upward to the light. Only philosophy can teach man to be born well, to live well, to die well, and in perfect measure be born again. Into this band of the elect – those who have chosen the life of knowledge, of virtue, and of utility – the philosophers of the ages invite YOU.“ Manly Palmer Hall*

Legends, distilled ancient knowledge. ( Perseus, Orion, Isis, Athena, Helen, Virgin Mary, The Hero, Snow White, Jack and the beanstalk)

This Egyptian deity under many names appears as the principle of natural fecundity among nearly all the religions of the ancient world. She was known as the goddess with ten thousand appellations and was metamorphosed by Christianity into the Virgin Mary, for Isis, although she gave birth to all living things – chief among them the Sun – still remained a virgin, according to the legendary accounts.

During the Middle Ages the troubadours of Central Europe preserved in song the legends of this Egyptian goddess. They composed sonnets to the most beautiful woman in all the world. Though few ever discovered her identity, she was Sophia, the Virgin of Wisdom, whom all the philosophers of the world have wooed. Isis represents the mystery of motherhood, which the ancients recognized as the most apparent proof of Nature's omniscient wisdom and God's overshadowing power. To the modern seeker she is the epitome of the Great Unknown, and only those who unveil her will be able to solve the mysteries of life, death, generation, and regeneration.

She gave birth to all living things – chief among them the Sun – and still remained a virgin.

This sun reflects the light of the "invisible" star (spiritual sun), which is the true source of life, light, and truth.

Temporal engineering trails and EPN ( Ever Present Now. Snail in the garden. Horizon: the curvature of the next density. Gravity/love collector of people through realities. Total and local “T”. 8935 ).

„Any sufficiently advanced technology is indistinguishable from magic.“ Arthur C. Clarke

According to the Mysteries, man was redeemed as the result of his passage in rotation through the twelve mansions of the heavens.

There is no "empty space" in nature.

Parasites exist also in 4D.

Trails of their temporal engineering\* are seen around us.

Manipulation of time speed and reference point could explain the technology.

Once we get there we shall meet them: the "giants" as of "Jack and the beanstalk".

\*temporal engineering - manipulation of the extra spatial dimension

\*linear time - specific trail in 4D space as experienced by 3D observer.
